## Hira Walraven – A Joint Venture Company

Hira Walraven is a joint venture company between Hira Industries, a renowned construction material manufacturing company and the Walraven Group based in the Netherlands, one of the oldest piping system manufacturing company located in Mijdrecht.

Hira Industries, since its inception in 1980 have been serving the Gulf region as the one of the best construction and building material manufacturing company, with the decades of experience in the building and construction industry, the company has been ranked in the top 10 SME's with offices in Middle East, India, Africa and South East Asia.

The Walraven Group originated from the Metal work company J. van Walraven B.V., a family business which was established in 1942 in Mijdrecht (NL). Today Walraven has its own production and sales companies in 10 European countries, the United States of America and from 2012 also in China. In the Walraven Group over 750 enthusiastic employees are active with the development, production and sales of our innovative products.

diamond walraven is a brand of Hira Walraven

## Company Profile

Hira Walraven is a joint venture company between Hira Industries LLC, based in United Arab Emirates and the Walraven group based in the Netherlands.

Since 1980, Hira Industries has been serving the construction industry with products of the highest quality conforming to international standards. Today, Hira Industries has manufacturing plants in United Arab Emirates and India, with sales offices in multiple locations across Middle East, India, Asia, Africa and USA. With more than 900 motivated employees from 20 nationalities, the group aims to constantly innovate and set the standards which would widen the gap between our competition and us.

The Walraven Group originated from the metal work company J.Van Walraven B.V., a family business which was established in 1942 in Mijdrecht (NL). Today Walraven has its own production and sales companies in ten European countries, the United States of America and China. In the Walraven Group over 750 enthusiastic employees are active with the development, production and sales of our innovative products.

## Quality

Our organization is ISO 9001:2008 certified. This way we continuously improve operational processes, and thus the quality of the entire organization.

Our products meet the highest quality standards and are approved by many international testing institutes such as

The technical properties of the products, like the maximum safe working load, are established and published by means of a standardized measuring method.

Within the measuring method the maximum load is calculated taking the maximum deflection into consideration.

## Leadership Team

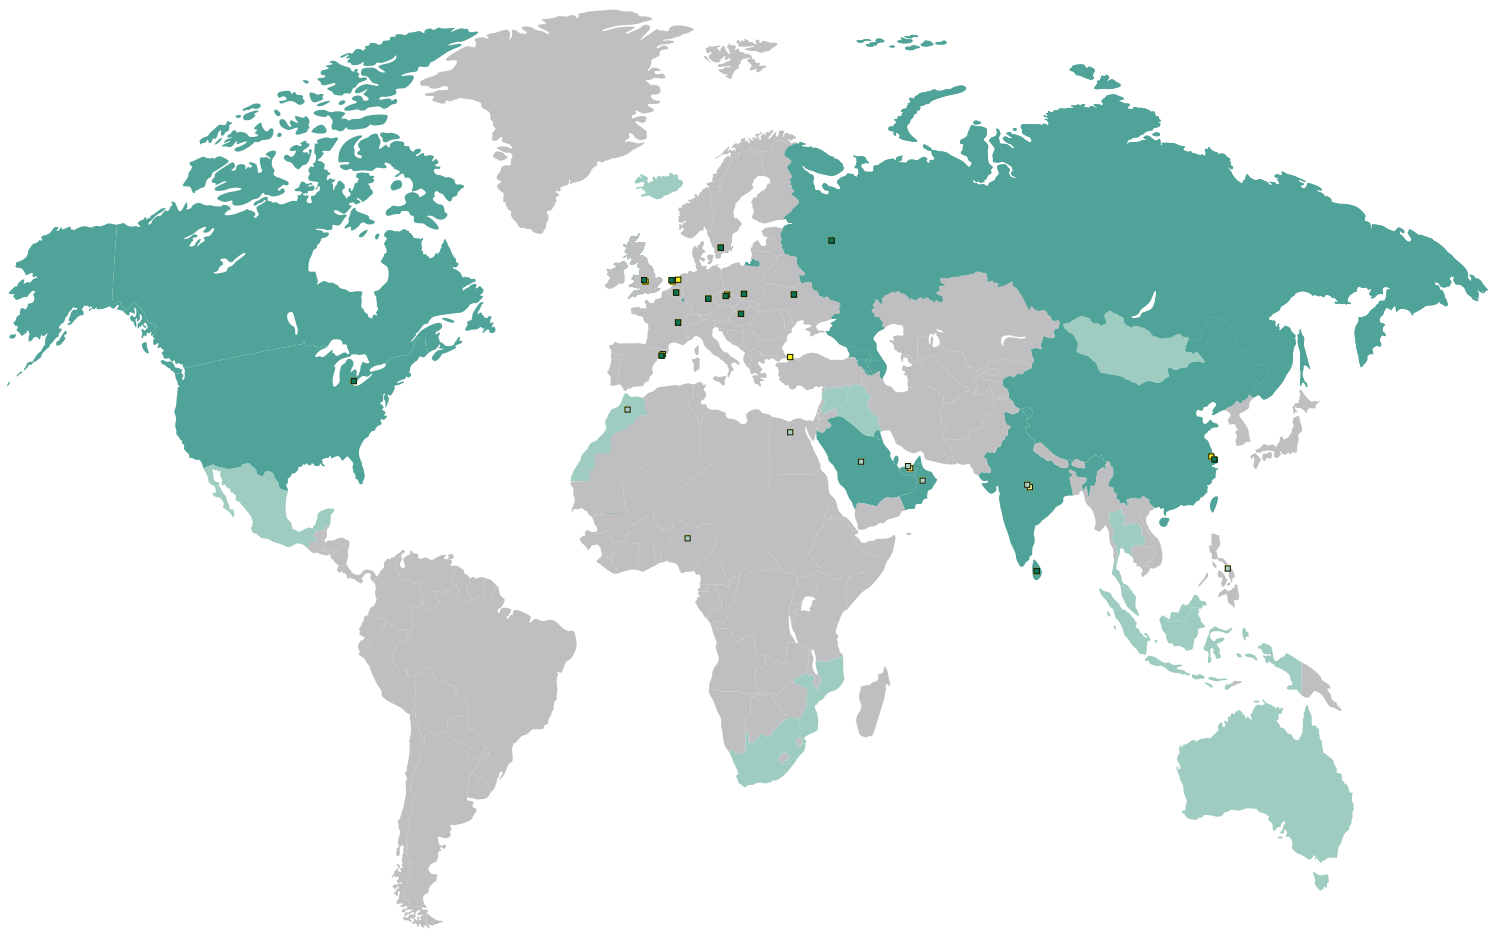

*All our employees are highly trained to assist in product selection, technical assistance and project support.*

## Table of Contents

## Technical Services – from Engineering to Site Support

### Design

With proven expertise from concept to completion, we develop intelligent support designs using CAD software and validate them through advanced analysis tools like finite element and anchor software giving you total confidence in the strength and reliability of your system.

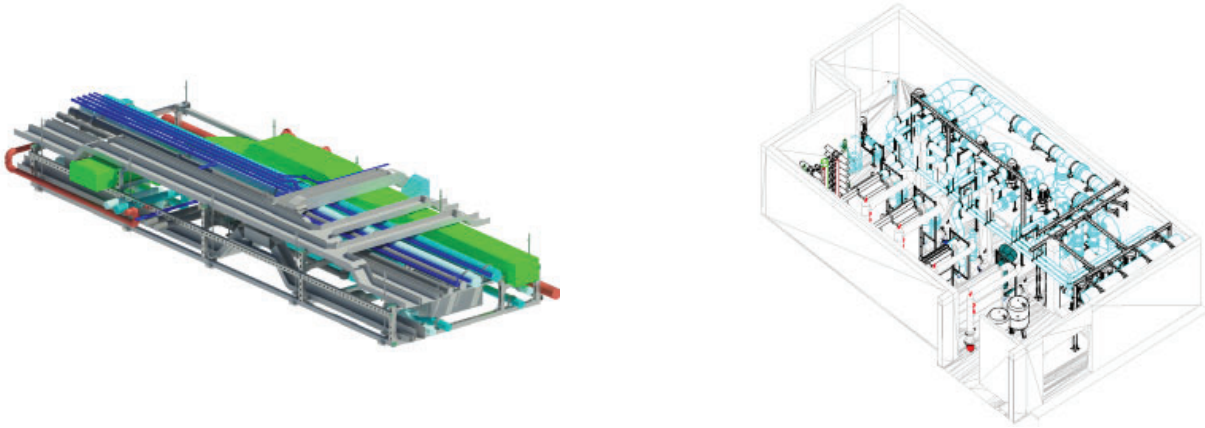

### Anchors Software

## Technical Services – from Engineering to Site Support

### BIM Support

We recognize the need for precision and collaboration in every stage of a project. Our hanger and support products are now available in BIM, helping designers and engineers plan confidently, minimize errors, and efficient installation.

### Pre-Fabrication

Prefabrication and the modular construction of building blocks have brought great benefits to the installation sector. Time and cost savings, together with faster and safer installation on-site, are among the most recognised benefits. By applying pre-assembled elements manufactured offsite.

### On-Site Support

We extend our support to the site offering hands-on training for proper system application and conducting pull-out tests to ensure anchor reliability and performance.
